

Foreword – Memorix	XI
Foreword – Memorix Histology	XII
Learning system of Memorix	XIV
Use of histology in pathology and the significance of histology for clinical specialisations	XV
Acknowledgements of everyone who helped create Memorix Histology	XVIII
Acknowledgements of student organizations	XX
Memorix team – vignettes	XXII

I. Introduction to Histology 1

Ivan Varga, Zbyněk Tonar, Jan Balko, David Kachlík, Radovan Hudák

1 Definitions	2	5 Czech history of histology	10
2 Terms and abbreviations	3	6 Slovak history of histology	11
3 Eponyms – Names according to famous scientists	5	7 15+ milestones of histology	12
4 World history of histology	8	8 Acknowledgements and references	14

II. Cytology 15

Ivan Varga, Zbyněk Tonar, Jan Balko, David Kachlík, Radovan Hudák

1 Introduction	16	5.11 Centrosoma/cytopentrum et centriolum	42
2 Discovery of cells and the theory of cells	19	– centrosome and centriole	42
3 Functional characteristics of animal cells	20	6 Morphology of specialized cells	42
4 Morphology of human cells	21	7 Signs of cell life	44
5 Basic cell structure	23	7.1 Transfer of substances through membranes, endocytosis and exocytosis	44
5.1 Plasmalemma – Cell membrane and biomembranes	24	7.2 Cell cycle (mitosis and meiosis)	48
5.2 Nucleus – Cellular nucleus	26	7.3 Cell death (apoptosis and necrosis)	50
5.3 Cytoplasm – Cytoplasm	31	7.4 Regeneration of cells and tissues (stem cells)	52
5.4 Mitochondria	32	8 Tables	53
5.5 Ribosomes	34	9 Description of cells	54
5.6 Reticulum endoplasmicum – Endoplasmic reticulum	35	10 Electronograms and micrographs	56
5.7 Apparatus/complexus golgiensis – Golgi apparatus / complex	36	11 Review questions and figures	64
5.8 Lysosoma et peroxysoma – lysosome and peroxisome	37	12 Acknowledgements and references	66
5.9 Inclusiones cytoplasmicae – Cellular inclusions	38		
5.10 Cytoskeleton	40		

III. General Histology 67

Zbyněk Tonar, Jan Balko, Ivan Varga, David Kachlík, Radovan Hudák

1 General histology	68	2 Four types of tissue	69
---------------------------	----	------------------------------	----

III. 1 Epithelial tissue 71

Martin Gavač, Alžběta Blanková, Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	72	3 Glands	82
2 Characteristics and origin of epithelia	74	3.1 Structure of exocrine glands	87
2.1 Basement membrane – Membrane basalis	75	4 Decision algorithms	88
2.2 Polarity of epithelial cells, differentiation cell membranes and cell junctions	75	4.1 Decision algorithm in epithelia	88
2.3 Division of epithelia	78	4.2 Decision algorithm for cover epithelia	88
2.4 Surface epithelia	80	5 Micrographs	90
		6 Review questions and figures	96
		7 Acknowledgements and references	98

III. 2 **Connective tissue** 99

Zbyněk Tonar, Jan Balko, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	100	5.3.2 Remodelling and healing of bone	122
2 Connective tissue cells	101	6 Mechanical properties of connective tissues	122
3 Extracellular matter fibers	106	7 Metastasis and epithelial–mesenchymal transition	124
4 Basic extracellular matrix	108	8 Table and schemas	124
5 Basic division of connective tissues	110	8.1 Table – Overview of glycosaminoglycans (GAG) in the extracellular matter of connective tissues	124
5.1 Textus connectivus proprius – Connective tissue proper	110	8.2 Schema – Connective tissue types	125
5.2 Textus cartilagineus – Cartilage	113	8.3 Table – Occurrence of cells the monocyto–macrophage system.....	125
5.2.1 Articular structures, synovial membrane and articular cartilage	115	9 Micrographs	126
5.3 Textus osseus – Bone	116	10 Review questions and figures	136
5.3.1 Ossification (osteogenesis)	120	11 Acknowledgements and references	138

III. 3 **Muscle tissue** 139

Richard Adamčík, Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	140	6.2 Table – Types of skeletal muscle fibers.....	154
2 General part	142	7 Algorithm – Types of muscle tissues	155
3 Skeletal muscle tissue	143	8 Myocardium electronogram	155
4 Cardiac muscle tissue.....	149	9 Micrographs	156
5 Smooth muscle layer	151	10 Review questions and figures	158
6 Tables	154	11 Acknowledgements and references	160
6.1 Table – Types of muscle tissues	154		

III. 4 **Nervous tissue** 161

Zbyněk Tonar, Jan Balko, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	162	9 Neuronal plasticity and regeneration	170
2 Occurrence of neural tissue	163	10 Tables	171
3 Peripheral nerve	163	10.1 Table – Location and character of neuroglial cells	171
4 Neuron – Nerve cell	164	10.2 Table – Neurotransmitters	171
5 Action potentials	166	11 Micrographs	172
6 Synapsis – Synapse.....	167	12 Schematics – Neurons and neuroglia	174
7 Neuroglia	168	13 Review questions and figures	175
8 Envelopes of neurons and myelination	169	14 Acknowledgements and references	176

III. 5 **Blood and hematopoiesis** 177

Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	178	3.4 Hematopoiesis – Monopoiesis	191
2 Blood	180	3.5 Hematopoiesis – Lymphopoiesis	192
2.1 Erythrocytes – Red blood cells.....	181	3.6 Hematopoiesis – Thrombopoiesis	193
2.2 Leukocytes – White blood cells.....	182	4 Table and schemas.....	194
2.2.1 White blood cells – granulocytes/polymorphonuclears	182	4.1 Table – Blood count	194
2.2.2 White blood cells – agranulocytes/mononuclears	184	4.2 Scheme – Arneth's classes	194
2.3 Thrombocytes – Platelets	185	4.3 Scheme – Hematopoiesis	195
3 Hematopoiesis	186	5 Micrographs	196
3.1 Hematopoiesis – Blood lines	187	6 Review questions and figures	198
3.2 Hematopoiesis – Erythropoiesis	188	7 Acknowledgements and references	200
3.3 Hematopoiesis – Granulopoiesis/myelopoiesis	190		

IV.

Special Histology / Microscopic Anatomy

201

IV. 1

Heart and blood vessels

203

Jan Balko, David Kachlík, Zbyněk Tonar, Ivan Varga, Radovan Hudák

1 Introduction	204	7 Venae – Veins	216
2 General part	206	8 Micrographs	218
3 Cor – Heart	208	9 Decision algorithm for blood vessels	220
4 General structure of a vessel	211	10 Table – Endothelium functions	220
5 Arteriae – Arteries	212	11 Review questions and figures	221
6 Vasa capillaria – Capillaries	214	12 Acknowledgements and references	222

IV. 2

Lymphatic and immune system

223

Jan Balko, Ivan Varga, Zbyněk Tonar, David Kachlík, Radovan Hudák

1 Introduction	224	6 Splen/lien – Spleen	238
2 General part	226	7 Tonsillae – Tonsils	240
2.1 The organs of the immune system	227	8 MALT (Mucosa-associated lymphoid tissue)	
2.2 Noduli lymphoidei – Lymph nodules / lymphoid nodules	228	– mucosa-associated lymphoid tissue	241
2.3 Maturation of B-lymphocytes	229	9 Vasa lymphatica – Lymphatic vessels	241
2.4 Specific immunity cells	230	10 Immune cell schema	243
3 Thymus	232	11 Decision algorithm in immune organs	243
3.1 Maturation of T-lymphocytes	234	12 Micrographs	244
3.2 Division of mature T-lymphocytes	235	13 Review questions and figures	247
4 Medulla ossium – Bone marrow	236	14 Acknowledgements and references	248
5 Nodi lymphoidei/lymphatici (lymphonodi)			
– Lymph/lymphoid nodules	236		

IV. 3

Digestive system

249

Martin Gavač, Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	250	3.7 Glandulae salivariae – Salivary glands	268
2 General structure of the digestive tube	252	4 Pharynx	270
3 Cavitas oris – Mouth cavity	255	5 Oesophagus	271
3.1 Labia oris – Lips	256	6 Gaster – Stomach	272
3.2 Bucca – Cheek	257	7 Intestinum tenue – Small intestine	275
3.3 Palatum – Palate	257	8 Intestinum crassum – Large intestine	278
3.4 Dentes – Teeth	258	9 Hepar – Liver	282
3.4.1 Teeth – Enamel	259	10 Vesica biliaris/fellea – Gallbladder	286
3.4.2 Teeth – Dentin	261	11 Bile duct	287
3.4.3 Teeth – Cement	263	12 Pancreas	288
3.4.4 Teeth – Dental pulp	264	13 Micrographs	290
3.4.5 Dentoalveolar junction – Tooth fixation in the jaw	265	14 Tables – Intestinal cells and structures	306
3.5 Gingiva – Gum	265	15 Review questions and figures	307
3.6 Lingua – Tongue	266	16 Acknowledgements and references	310

IV. 4

Respiratory system

311

David Kachlík, Jan Balko, Zbyněk Tonar, Ivan Varga, Radovan Hudák

1 Introduction	312	7 Pulmones – Lungs	321
2 General part	314	8 Pleura – Pleura	325
2.1 General structure of airways	315	9 Schemes	326
2.2 Cells of airway epithelium	316	9.1 Scheme – Bronchial and alveolar tree	326
3 Cavitas nasi – Nasal cavity	317	9.2 Scheme – Airway epithelium	326
3.1 Sinus paranasales – Paranasal sinuses	317	10 Micrographs	328
4 Pharynx	318	11 Decision algorithm	332
5 Larynx	318	12 Review questions and figures	332
6 Trachea	320	13 Acknowledgements and references	334

IV. Special Histology / Microscopic Anatomy

IV. 5 Urinary system 335

Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	336	6 Urethra	348
2 General part	318	7 Micrographs	350
3 Ren – Kidney	339	9 Schemes – Nephron and renal corpuscle	353
4 Ureter	346	10 Review questions and figures	354
5 Vesica urinaria – Urinary bladder	347	11 Acknowledgements and references	356

IV. 6 Male genital system 357

Alžběta Blanková, Jan Balko, Zbyněk Tonar, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	358	11 Glandula bulbourethralis Cowperi – Bulbo–urethral gland	372
2 General structure	360	12 Penis	372
3 Testis	361	13 Ejaculate	374
3.1 Spermatogenesis	363	14 Schemes	375
4 Intratesticular efferent ducts	366	14.1 Scheme – Spermatocytogenesis	375
5 Epididymis	366	14.2 Schema – Epithelium of male reproductive tract	375
6 Ductus deferens	368	15 Micrographs	376
7 Funiculus spermaticus – Seminal funicle	368	16 Algorithm for tubular structures	380
8 Glandula vesiculosa – Seminal gland	369	17 Review questions and figures	381
9 Ductus ejaculatorius – Ejaculatory duct	369	18 Acknowledgements and references	382
10 Prostate	370		

IV. 7 Female genital system 383

Alžběta Blanková, Ivan Varga, Jan Balko, Zbyněk Tonar, David Kachlík, Radovan Hudák

1 Introduction	384	7 Organa genitalia feminina externa – External female genital organs	402
2 Organa genitalia feminina – Female genital organs	386	8 Early embryonic development and fetal covers	404
3 Ovarium – Ovary	386	9 Placenta	406
3.1 Oogenesis– Development and maturation of oocytes	388	10 Funiculus umbilicalis – Umbilical cord	408
3.2 Follicle development	390	11 Schemes	408
3.3 Blood–follicle barrier and follicular atresia	392	11.1 Scheme – Oogenesis and fertilisation	408
3.4 Luteogenesis – Development of the corpus luteum	392	11.2 Scheme – Ovarian and menstruation cycle	409
3.5 Ovarian cycle	394	11.3 Scheme – Uterine glands	409
4 Tuba uterina – Uterine tube	395	12 Micrographs	410
5 Uterus	396	13 Review questions and figures	416
5.1 Menstruation (endometrial) cycle	400	14 Acknowledgements and references	418
6 Vagina	401		

IV. 8 Nervous system 419

Zbyněk Tonar, Jan Balko, Ivan Varga, David Kachlík, Radovan Hudák

1 Introduction	420	8 Liquor cerebrospinalis – Cerebrospinal fluid	430
2 Development of the nervous system	422	9 Meninges	431
3 Peripheral nerve	423	10 Claustrum haematoencephalicum – Blood brain barrier	431
4 Ganglia	424	11 Micrographs	432
5 Medulla spinalis – Spinal cord	425	12 Decision algorithm for the CNS cells	435
6 Cerebellum	426	13 Review questions and figures	435
7 Telencephalon	428	14 Acknowledgements and references	436

David Kachlík, Richard Adamčík, Jan Balko, Zbyněk Tonar, Ivan Varga, Radovan Hudák

1 Senses – Introduction	438	1.4.6 Structurae accessoriae oculi – Accessory ocular structures	455
1.1 Receptor	440	1.5 Auris – Ear	458
1.1.1 Mechanoreceptors, nociceptors and thermoceptors – Skin bodies	441	1.5.1 Auris externa – External ear	459
1.1.2 Ineroceptors – Internal environment receptors	442	1.5.2 Auris media – Middle ear	459
1.1.3 Proprioceptors – Locomotor system receptors	443	1.5.3 Auris interna / organum vestibulocochleare – Inner ear	460
1.2 Organum gustatorium – Gustatory organs	444	2 Skin	463
1.3 Organum olfactorium – Olfactory organs	445	2.1 Epidermis – Epidermis	464
1.4 Organum visus – Visual organs	446	2.2 Dermis/corium	466
1.4.1 Tunica fibrosa bulbi – Fibrous outer layer	447	2.3 Tela subcutanea / subcutis / hypodermis – Subcutaneous tissue	467
1.4.2 Tunica vasculosa bulbi / uvea – Vascular medium layer / uvea	448	2.4 Skin types	467
1.4.3 Lens	450	2.5 Adnexa cutis – Accessory skin organs / skin appendages	468
1.4.4 Tunica interna bulbi / retina – Nerve inner layer / retina	451	2.6 Mamma et glandula mammaria – Breast and mammary gland	472
1.4.5 Camerae bulbi et corpus vitreum – Eyeball chambers and vitreous body	454	3 Micrographs	474
		4 Review questions and figures	480
		5 Acknowledgements and references	482

Alžběta Blanková, David Kachlík, Jan Balko, Zbyněk Tonar, Ivan Varga, Radovan Hudák

1 Introduction	484	6 Glandula suprarenalis – Adrenal gland	492
2 General part	485	7 Insula pancreatica – Pancreatic (Langerhans) islet	495
3 Hypophysis / glandula pituitaria – Pituitary gland	485	8 Glandula pinealis – Pineal gland	496
3.1 Adenohypophysis / lobus anterior – Adenohypophysis / anterior lobe	486	9 Diffuse endocrine system (DES)	497
3.2 Neurohypophysis / lobus posterior – Neurohypophysis / posterior lobe	488	10 Paraganglia	497
4 Glandula thyroidea – Thyroid gland	489	11 Micrographs	498
5 Glandula parathyroidea – Parathyroid gland	490	12 Review questions and figures	503
		13 Acknowledgements and references	504

Zbyněk Tonar, Ivan Varga, Jan Balko, David Kachlík, Radovan Hudák

1 Light microscope	506	7 Blood smear processing	516
1.1 Formation of picture in the microscope	507	8 Detection of selected substances at histological level	517
1.2 Observation techniques in light microscope	508	9 Examples of antigens demonstrated in immunohistochemistry	517
2 Electron microscope	509	10 Description of the parts of the microscope	518
2.1 Comparison of light and electron microscopy	510	11 Algorithm of preparation processing	518
3 Processing of histology samples	510	12 Microscopy technique facts	519
3.1 Technique of frozen sections	512	13 Overview of staining	520
3.2 Glossary of terms used for staining	512	14 Artefacts in light microscopy	522
3.3 Staining of histology preparations	513	15 Practical tips for microscope work	524
4 Special methods in histology and related fields	514	16 Review questions and figures	530
5 Glossary of terms for immunohistochemistry	515	17 References	531
6 Tooth and bone processing	516	18 Acknowledgement to the reviewers	532

Zbyněk Tonar, Jan Balko, David Kachlík, Ivan Varga, Radovan Hudák

1 Appendix 1: Window into mammalian histology	533	2 Appendix 2: Cytology dictionary	540
